GF900, 900 W/230V

QUALITY FEATURES

- completely made of stainless steel 1.4301
- rounded hangers / no dents or pressure marks
- working in dry clothes reduces number of staff away sick
- drying on a regular basis prolongs the life cycle of the clothing
- maintenance-free
- 10 years full warranty on the drying hangers
- technical data blower: : PN Ø 900 W/h, 230V
8 A device fuse, Cos Φ 0,69

Patented fast coupling system. Each drying hanger can easily be detached from the air conveying carrier bar.

What are the advantages of detachable hangers?

1. They facilitate putting on and taking off the clothes
2. If one or more drying hangers are not being used, the air outlet port(s) can be closed with a closing cap.

**MORE THAN 30 YEARS'
EXPERIENCE**

Ideal for construction yards and road maintenance staff

Warm air is conducted through stainless steel hangers and emerges via nozzles.

The warm air blower which was designed especially for our drying systems generates an enormous air speed which results in very fast drying.

1 warm-air blower can operate up to 8 drying hangers for jackets and boots.

Dry clothing for satisfied and motivated employees!
